

Alessandro Metaxas

Product Designer (UI/UX)

0419100063 | ↗ [aometdesign@gmail.com](mailto:aometdesign@gmail.com) | Melbourne, Victoria

Professional Summary

Product Designer with 10+ years of experience designing SaaS and digital products from discovery through delivery. Combining a foundation in Industrial Design with UX, UI and front-end development knowledge (HTML, CSS and JavaScript), I collaborate with cross-functional teams to create scalable, user-centred experiences that balance customer needs, business goals and technical feasibility.

Skills

- Information Architecture
  - Wireframing
  - User-Centred Design
  - Design Thinking
- Responsive Design
  - Mobile-First Design
  - Front-End Collaboration
  - Data-informed Design
  - Customer Research
- Product Discovery
  - Stakeholder Management
  - Design Tokens
  - Visual Design
- Interaction Design
  - Material Design
  - Design QA
  - Workshop Facilitation
  - Agile& Scrum

Experience

➔ Product Designer

November 2022 - July 2026

Phriendly Phishing | Full-Time | B2B SaaS Platform

Melbourne VIC | HYBRID

- Worked as the lead Product Designer within a cross-functional team, partnering with Product, Engineering and stakeholders to design user-centred solutions that balanced customer needs with business objectives.
- Led end-to-end product design from discovery, user research and ideation through prototyping, UI design, developer collaboration and implementation.
  - Presented design concepts and rationale to stakeholders, facilitating discussions that aligned customer needs with business objectives.
  - Collaborated closely with Product, Engineering and stakeholders to define product priorities, align design decisions with business goals and shape product direction.
  - Conducted user research, usability testing and analysed customer feedback to identify pain points, validate hypotheses and inform product decisions.
  - Utilised AI-assisted design and research tools to accelerate ideation, documentation and design exploration.

Achievements:

- Led the design function by coordinating design initiatives, delegating work across projects and maintaining high design quality throughout delivery, improving brand recognition, product adoption and user experience.
- Built a scalable design system that improved consistency, streamlined developer handoff and accelerated

feature delivery across multiple product initiatives.

- Designed and delivered the Learning Management System (Learner Hub), leading the product from early discovery and concept exploration through design, validation and implementation.
- Established scalable design processes and documentation that improved team efficiency and streamlined collaboration across Product and Engineering teams.

## ➡ UX Designer

**March 2022 - November 2022**

*PLAYCAP | Part-Time | Video Game & Entertainment*

*Melbourne VIC | (REMOTE)*

Worked as the lead UX Designer within a cross-functional team, collaborating with Product, Engineering and stakeholders to create intuitive, user-centred experiences across digital products.

- Led end-to-end UX/UI design from discovery, user research and ideation through wireframing, prototyping, visual design, developer collaboration and implementation.
- Designed high-fidelity interfaces and interactive prototypes in Figma, ensuring consistency across the product experience and supporting efficient developer handoff.

### Achievements:

- Built and maintained a scalable design system, component library and organised Figma architecture that improved collaboration and accelerated product development.
- Established design processes and documentation that improved communication between Design and Development teams, resulting in more consistent implementation.

## ➡ Product Designer

**June 2020 - January 2023**

*AOM Design | Self-employed | Design Freelance*

*Melbourne VIC | (ON-SITE)*

Worked independently with clients across a range of industries, leading projects from initial consultation through to delivery.

- Managed multiple client projects simultaneously, balancing priorities, timelines and project scope to deliver high-quality outcomes.
- Collaborated with clients and stakeholders to define requirements, prioritise features and translate business goals into intuitive digital experiences.

### Achievements:

- Successfully delivered digital products and features for multiple clients, taking projects from concept through to implementation.
- Established reusable design systems, component libraries and structured Figma workflows that improved collaboration and accelerated future project delivery.

## ➡ Product Designer

**March 2019 – May 2019**

*ST Dupont | Internship | Luxury Goods*

*Paris France | (ON-SITE)*

Worked within multidisciplinary product development teams, collaborating with industrial designers, engineers and

manufacturing specialists to develop luxury consumer products from concept through production.

- Developed luxury product concepts from initial ideation through 3D modelling, collaborating with engineering and manufacturing teams to ensure design feasibility.
- Presented concepts to design leadership, incorporating feedback to refine products prior to production.

#### Achievements:

- Contributed to the successful delivery of three commercial products from concept to production.

### ➡ Product Designer

**December 2018 – February 2019**

*L'Epée 1839 | Internship | Luxury Goods*

*Switzerland, Delemont | (ON-SITE)*

Worked within multidisciplinary product development teams, collaborating with industrial designers, engineers and manufacturing specialists to develop luxury consumer products from concept through production.

- Developed luxury product concepts from initial ideation through 3D modelling, collaborating with engineering and manufacturing teams to ensure design feasibility.
- Presented concepts to design leadership, incorporating feedback to refine products prior to production.

#### Achievements:

- Contributed to the successful delivery of three commercial products from concept to production.

### ➡ Product Designer

**March 2016 – November 2018**

*Monash University | Full-Time | Education*

*Melbourne VIC | (ON-SITE)*

- Worked across multidisciplinary design projects, conducting user research, developing concepts and presenting solutions to design leads and clients.
- Applied user-centred design principles to create digital and physical product experiences from discovery through production.

---

## Tools

- |                         |              |              |
|-------------------------|--------------|--------------|
| • Figma                 | • HTML       | • Jira       |
| • Figjam                | • CSS        | • Confluence |
| • Adobe Creative Suite  | • JavaScript | • Miro       |
| • 0365 Microsoft office | • Github     | • Teams      |
- 

## Education

- Monash University | Bachelor of Industrial Design | 2016 - 2018
