- Material Design Standards 3.

Technical Skills

- Figma
- 0365
- Photoshop
- Illustrator.
- Indesign
- HTML
- CSS
- JavaScript

Education

- Monash University | Bachelor of Industrial Design
- 2016 - 2018

Alessandro Metaxas

Working as a *'Product Designer'*, my background is in Industrial design where I started with my education about design principles; over time I have branched out into other fields such as graphic, visual branding, concept art, illustration as well as motion design.

I have gone down a more technical path to improve my abilities in digital products, learning about front end development (*HTML, CSS and JavaScript*) to improve my abilities as a: product designer, User Experience as well as User Interface Designer.

EXPERIENCE

2022 - Present

Product Designer - Phriendly Phishing

- Designing/optimising Phriendly Phishing platform based on user research and data to improve overall experience for customers.
- Creating artifacts to better understand the business's market in shaping an experience for the user-base that addresses issues and pain-points they are experiencing.
- Creating prototypes for the platform, demonstrating to users to garner feedback and implement into the final product/service.
- Building a Design System to improve communication between other teams and improve the overall process in creating the final product.
- Ongoing testing and appraisal to optimise the user experience with the platform.

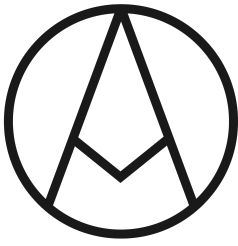

RESULTS | *Worked on 3 platforms (Main, Email Triage and Learning Management System), refined the design system and created the documentation guidelines.*

2022

UX Designer - PLAYCAP Software

- Working alongside software developer and creative director to build out a video game.
- Responsible for the usability of the game in relation to menu, controls and other Heads Up Display (HUD) elements.
- Liaise with the rest of the team to ensure functionality was implemented accordingly.

RESULTS | *Built assets and contributed to the games development.*
